

CRStar Insights

Enhanced Reporting Tab

This CRStar Insight will show users the ease in which they can select and run a multitude of reports from ONE screen, eliminating the need to visit two different screens (as in previous versions of CRStar). These screens were made available to all users February 1, 2023 under the CRStar Reporting tab.

To access the dual screen feature from the **List Pop** tab, the user will click on "Create a Population Label". (See page 2 for screen example.)

The screenshot shows the CRStar Reporting interface. At the top, there are two tabs: "List Pop" (selected) and "Graph Pop". Below the tabs, there is a "Create a Population Label" button, which is circled in red and has a blue arrow pointing to it. To the right of this button is a "Population Label:" dropdown menu. Below these are "Delete Label" and "Edit Selection" buttons. The main area is titled "Choose the Items for Your Report" and contains a table with columns: Item Nbr, Item Description, B/S/L, C/D, Display Length, and Limiting Values. The table has 10 rows, with the first row highlighted in red. Below the table are "Add" and "Delete" buttons. At the bottom, there are fields for "Heading:" and "File Name:", a checkbox for "Include Column Headers", and a "Reporting Device" section with radio buttons for "Excel", "File Delimited", "File Fixed-Width", "Screen" (selected), and "Xml". At the very bottom, there are "Start Time:" and "End Time:" fields, and a row of buttons: "Run", "New", "Delete", and "Save".

Start Time: 10:42:41 AM End Time: 10:42:41 AM

The user has the ability to enter the **selection criteria** and build the **ad hoc list report** immediately, without leaving the screen.

Graph Pop Option

When utilizing the **Graph Pop** tab (green tab shown above), the user can select “Create a population label.” This option gives the user the ability to enter the selection criteria and predetermine a multitude of individual reports to be run simultaneously. Each report can be displayed in either code/description along with the ability to sort each unique graph when created.

3				

For each report element, fill in the field index number and the desired report output. Each report will appear on its own unique tab at the bottom of the Excel report (sample below). The screen is preset to enter in four field index numbers, but the user can add additional reports by clicking the "Add" option in the bottom right-hand corner of the screen.
