

CRStar Insights

IL New Case and Corrections Submissions

The IL Central Cancer Registry requires that facilities submit new cases as well as cases that have been corrected since the initial data submission. This CRStar Insight will illustrate the submission of both new and corrected cases. Cases are selected via the Select a Population function using the State Report Flag field as criteria. New case records that are ready for transmit should have the State Report Flag set to "Y" by the abstractor upon completion. Modified records will have a State Report Flag of "C" (if the data modifications involve fields that trigger a correction record). The "C" flag is assigned automatically by CRStar based on Illinois State Cancer Registry Standards.

To select new case records for transmit, create a population that selects all cases where the State Report Flag is coded to a "Y" as shown below.

Select a Population

Population Label: State Transmit

Requested By: Nicki Skipper Request Date: 05/12/2023

Hospitals: 11 GENERAL HOSPITAL Include Duplicates of Shared Patients

Dx Date 1st Contact Date From: mm/dd/yyyy To: mm/dd/yyyy

Abstract/Suspense Cases

Abstract Cases Only Analytic Cases Only

Suspense Cases Only Complete Cases Only

All Cases Incomplete Cases Only

Non-Reportable State Flag

Site	Site Description

Add Delete

To export the data, click on Enhanced Reporting > Data Exports > State export. Select your population label. The Filename will default to "State Export" and can be modified as needed. For Export Type, select "New" as shown below:

State Export NCDB/RCRS Export

Population Label: State Export July 2023

Filename: State Export

Update State Report Flag and Transmit Date
 Run GenEdits after Export
 Zip Data File

Export Type:
 New
 Corrections

Start Time: - End Time: -

Run New

To select modified records for transmit, create a population that selects all cases where the State Report Flag is coded to a "C" as shown below.

To export the data, click on Enhanced Reporting > Data Exports > State export. Select your population label. The Filename will default to "State Export" and can be modified as needed. For Export Type, select "Corrections" as shown below:

The screenshot shows a web form titled "Export State Data". It contains the following fields and options:

- Population Label:** A dropdown menu with the selected value "State Corrections Export July 2023".
- Filename:** A text input field containing "State Export".
- Checkboxes:**
 - Update State Report Flag and Transmit Date
 - Run GenEdits after Export
 - Zip Data File
- Export Type:** Radio buttons for "New" and "Corrections". The "Corrections" option is selected.
