CRStar
Enhancements & Corrections

August 24, 2023

Enhancements

- Newly enhanced reports containing new features. These reports can be found under **Enhanced Reporting** (previously CRStar Reporting) on the left navigation panel. These include:
  - o Productivity
  - o Timeliness
  - o Treatment Distribution: Treatment by Site
  - o TNM graph

  For detailed instructions, please refer to **CRStar Insight - Enhanced Reporting Module Released 8/24/2023** located on the CRStar Resource Page.

Note: Existing reports that have not yet been enhanced remain in the Reporting tab. However, the tab is now located under the Help option.

- The Date Case Complete program has been updated to include the 2023 primary surgery fields
- The following menu items have also been re-written in the new platform; however, the functionality is unchanged: User Security, Import Config Screen, Global DIR, DB Validation
- The following states now have the version 23 export: **AR, AZ, GA, IA, ID, IL, KS, LA, MA, MD, MN, MO, MT, NC, NJ, NM, NY, OK, OR, PA, SC, TN, TX, WI, WV, WY**

Corrections

- A correction has been made to correct the font on the Hemopoietic/Immuno/Other Text label as well as the Chemotherapy Text labels on the individual modality screens
- Some histology codes that were missing the first letter to their descriptions have been corrected
- A correction has been made to return the functionality to open the drop-down options with the down arrow key
- Select a Pop has been corrected to allow items to be searched by description and the Edit Select feature can also now be used to modify the selection criteria

State Specific Updates

- **Iowa** – The state specific screen has been updated according to the Central Registry requirements
- **Idaho** – The state specific screen has been updated according to the Central Registry requirements

State Specific Updates, cont.

- **Illinois** – A modified record State data export is now available as requested by the Central Registry requirements. Please see the **CRStar Insight – IL New Case and Corrections Submissions** under the Individual State Information section on the Resource Page for detailed information
- Correction trigger fields have been updated for North Carolina and New Jersey to include the v23 requirements
