# CRStar by Health Catalyst
## Enhancements & Corrections
## November 30, 2023

## Enhancements

- New screens have been added in the abstract for CPM, BPM and RPM Audit Checklists. Please refer to the **CRStar Insight Accreditation Audit Screens** and the **Audit Screens Short Take** video located on the CRStar Resource page under the Newly Added Documentation section
- Mass Delete, Import and Global Change screens have been updated to the new platform

## Corrections

- Select a Pop has been corrected to clarify the options chosen on the screen for unique primaries, the hospital code may now be left blank as needed, and the pop label dropdown list can be searched and sorted without losing the search criteria
- Creating a Select a Pop at the top of any report has also been corrected to select criteria while running the report
- A correction has been made to the Copy Abstract screen to prevent the cursor from jumping
- Corrections to the Import Configuration screen have been made to save all the date formats properly. Additionally, the copy button will now prevent duplicate import configuration names
- The descriptions were corrected on field index #829 Non-Cancer Directed Surgery Code, so they display in reports correctly for the summary fields
- The NAACCR Export has been updated to remove a DX year cap on the Surg-Prim 03-2022 field that was not necessary

## State Specific Updates

- **California** – Updates have been made for v23 compliance and approval from the State has been granted
- **North Dakota** – State export has been updated to include the v23 state specific items

| Metafile Names | |
|---|---|
| California (released 08/01/2023) | CA_v23B |
| Maryland (released 10/18/2023) | MD_v23B |
| Texas (released 10/26/2023) | TX_v23B |
