Enhancements & Corrections

June 3, 2024

Enhancements

- The QA Form has been enhanced with on screen editing capabilities to capture text entries while printing and/or creating a PDF
- Updated the internal Kendo UI license
- Added in Field Index # 198 Behavior Code that can be used in reports
- Modified record triggers have been updated to v24 for GA, CO, IL, MN, NJ, RI, SC, TN, TX, WI
- The following states now have the v24 state export available: **AR, NC, and NY**

Corrections

- The NAACCR and NCDB Exports v24 have been updated to remove unnecessary default values for the retired Tumor Marker fields
- Copy Abstract has been updated to run more efficiently and avoid errors

State Specific Updates

- Maryland – The state requirement for a special report has been included. Please refer to the CRStar Insight “Annual Case Reports to MCR” for more details (found under “Individual State Information” on the CRStar Resource Page)
