Enhancements & Corrections
November 21, 2024

Enhancements

- A new CPM Report is now available on the Accreditation Reports tab. Please refer to the CRStar Insight, "CPM Accreditation Reports" for additional details.
- The Follow-Up Management menu items have been updated to their new format: Follow-up Letters, On Demand, and Follow-up Calculations.
- The site code and topography code will now be synced except when the site code is 77.
- The QA Form has been updated to align with the CoC standards.
- The following states now have the v24 state export available: **CA and WY.**

Corrections

- A correction has been made to the Custom Forms and Follow-up letters screen to display the line spaces added in the print preview.
- A correction has been made so that the 9th TNM Edition defaults appropriately for those schemas.
- The CPM, BPM, and RPM audit screens were updated to more closely match the standards, and a correction has been made to allow a radio button option to be unselected.

State Specific Updates

- California – The exports have been adjusted and approved by the Central Registry for v24.

Metafile Names	
California (Released 10/18/2024)	CA_v24A
Indiana (Released 10/14/2024)	IN_v24A – included to clients already in Oct
